

STACKER LIGHTS - LED MODULES

This unique modular stacker light system allows you to easily mount and replace LED modules. Coming in the standard variety of colours; red, yellow, green, blue and white, the modules clip together without the use of specialist tools or complicated wiring diagrams. All the benefits of LED lighting, long life, anti-shock, durability and low current draw make this stacker light range great value

50mm range

LED module colour	Operating status	Part number AC85 - 275V	Part number DC24V
